

Negative space sketchbook assignment

For this assignment, I would like you to sketch a minimum of 5 items in your house. This can be done separately, or with the objects grouped together.

Artwork by Peter Lunstrom

Instead of drawing the object, I would like you to shade in the space ***around*** the object with pencil to create the impression of the object with the white paper surface that remains. ***Please avoid drawing an outline of an object first and shading around it.***

In addition to these 5 objects, I would like you to combine 2 objects so that the negative and positive space both create the illusion of an object (see below). You will complete 1 (one) drawing of this type.

Number each one of these 6 sketches.

Please make each sketch no smaller than $\frac{1}{2}$ page.

This project is out of 15 marks.
