

Please answer the following in the body of your IMDB review for “The Great Gatsby” (2013)

What is the importance of eyes in this film? We see the billboard advertising an optometrist looking over the Valley of ashes at least twice in the film. Does it relate in any way to the opening lines of the film? (you’ll need to google the opening lines of the film, which are *slightly* different from the book.)

Also, what do these eyes represent?

Are there any other symbols alluded to in the film?

What do Daisy and Tom Buchanan represent? What is the moral of the story at the end of the book... or is there a moral to the story at all?

Why does Daisy choose to stay with Tom instead of going with Gatsby?

What are the 4 locations in the film, and which character(s) would you associate with each location? Why?
