

#1 Mini Project

School Objects

Ms. Gruys

Due Wednesday November 9th

Following the Digital Camera Guide and adjusting your settings, you should be familiar with the controls of the Nikon digital camera and how it works.

To demonstrate your knowledge of the digital camera, take *five photos* under the theme ‘school objects’.

Ensure these photos aren’t over or under exposed by adjusting your camera controls—the aperture, shutter speed, ISO, etc. (*The light meter on your camera should be in the middle.*)

After you’ve taken and chosen your five photos upload them to your STUDENT FOLDER under the folder name ‘**SCHOOL OBJECTS**’.

(Putting the photos in the correct place is part of your mark).

Have fun!

Weight 5 marks.
