Raw File Project
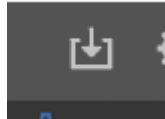

1. Navigate to the shared "Photography" folder in OneDrive.
2. Download and open the NEF files in Adobe Camera Raw folder as shown in **this video.** Watch the video at least once before editing, then follow along and edit the images. Note the important instructions at the end on how to save your images.
3. Save your images as shown at the end of the video using the button that looks like this:

4. Upload your named "Edited" folder ("YourNameEdited") to your OneDrive and then copy it to the correct location for marking. It should contain 3 correctly named jpeg files.
5. I encourage you to create a folder in your OneDrive that contains the subfolder "YourNameEdited" folder. Copy the "RAW and JPG" folder to this location as well.
6. Upload the .XMP files to the RAW folder if you wish.
