Developing Room Questions

In the space below, list the objects you'll need to put into the dark-bag for film developing.

In the space below, please describe what to do inside the dark bag, to get the film ready for developing.

It is possible to tell if photographic film has been exposed to light? (Before it has been developed.)

True False

You don't need a dark bag if you develop film in the darkroom under red light.

True False

Darkroom Questions:

You may use any enlarger in the darkroom for contact sheets.

True False

You must use 5 second increments when creating a test strip for your contact sheet

True False

Negative carriers are interchangeable between enlargers

True False

It is OK to hang your negatives in the darkroom, and your prints in the developing room
