

Using Different Fonts

You have the ability to download and use many fonts that will work so much better than the default fonts in Photoshop

1. Go to a free font space such as "Dafont.com"
2. Download a font that appeals to you; click "download"
3. The font will be downloaded to your desktop as a zip file
4. Double click the zip file, a folder will appear.
5. Double click the folder, and select the font (it will have the .ttf extension)
6. A dialogue box will open, click the "Install Font" button
7. You will need to restart whatever application you are currently using in order to reload the fonts.
8. Have Fun!
