Shoot, Process, Print, Scan, Post

For this project you will be shooting a roll of film on any subject you like. This project will cover most of the learning you did last year

You will:

- Develop your film,
- Cut one sheet of 8"x10" photo paper into 3.5"x 5"s or 5"x7"s and make 2 or more prints
- Print a contact sheet.
- Scan the 2 photos <u>and</u> a few negatives.
- Touch up the photos in Photoshop to eliminate dust and scratches
- Create a folder with 5 digital images in it (a combination of scanned prints and negatives) Name the files "MyNameNeg1.jpg" "MyNamePrint2" etc.
- Hand in your contact sheet and photos to be marked as a hard copy.
- Hand in your electronic images in a folder to the correct location
